Supports iOS					■	■	■
Support for virtual environments - persistent and non-persistent (VDI)***	■	■	■	■		■	■

□ Basic functionality only. Additional protection available with other Panda Products.
 ■ Full functionality. Only in Aether-based solutions.
 * Panda Fusion is a bundle of Panda Endpoint Protection Plus and Panda Systems Management.
 ** Panda Fusion 360 is the combination of Panda Systems Management and Panda Adaptive Defense 360 which are also sold separately.

*** Compatible systems with the following types of virtual machines: VMware Desktop, VMware Server, VMware ESX, VMware ESXi, Citrix XenDesktop, XenApp, XenServer, MS Virtual Desktop and MS Virtual Servers. Panda Adaptive Defense 360 & Panda Fusion 360 solutions are compatible with Citrix Virtual Apps, Citrix Desktops 1906 & Citrix Workspace App for Windows. Panda Security has been verified as Citrix Ready partner.

AWARDS AND CERTIFICATIONS

Panda Security regularly participates in and receives awards for protection and performance from Virus Bulletin, AV-Comparatives, AV-Test, NSS Labs. Panda Adaptive Defense achieved the EAL2+ certification in its evaluation for the Common Criteria standard.

ADDITIONAL WATCHGUARD ENDPOINT SECURITY MODULES AND PRODUCTS

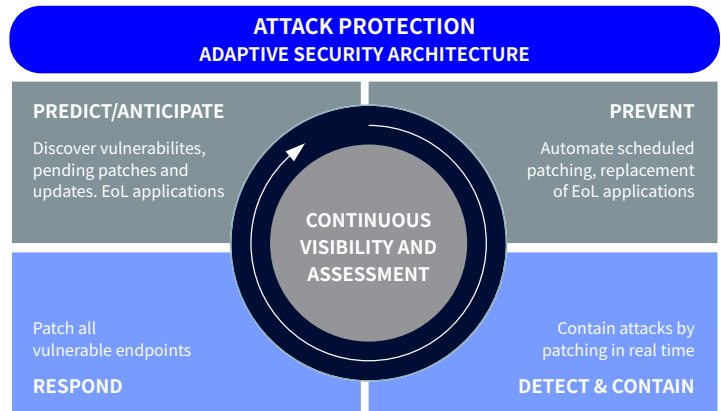

Panda Patch Management

Panda Patch Management is a module for managing vulnerabilities of the operating systems and third-party applications on Windows workstations and servers.

It does not require the deployment of any new endpoint agents or management console as it is fully integrated in all of Panda Security's endpoint solutions. Plus, it provides centralized, real-time visibility into the security status of software vulnerabilities, missing patches, updates and unsupported end of life (EOL) software, and is easy to install and monitor updates in real time.

[Supported platforms & requirements](#)

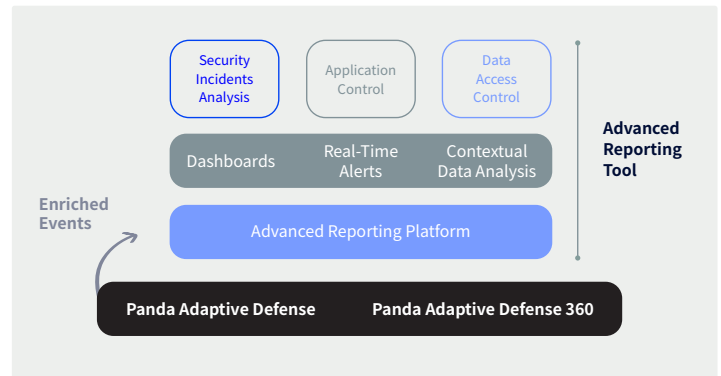

Advanced Reporting Tool

The **Advanced Reporting Tool** stores and correlates the information related to process execution and its context extracted by Adaptive Defense from endpoints. Automatically generates security intelligence and provides tools that allow organizations to pinpoint attacks and unusual behaviors, detecting internal misuse of the corporate systems and network to go deeper in a security investigation.

[More information](#)

[Supported platforms & requirements](#)

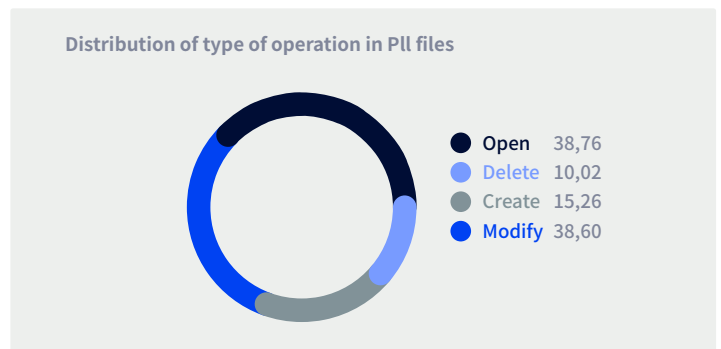

Panda Data Control

Panda Data Control is an unstructured data security module, designed to assist organizations in complying with data protection regulations, as well as discovering and protecting personal and sensitive data both in real time and throughout its lifecycle on endpoints and servers. Panda Data Control discovers, audits and monitors unstructured personal data on endpoints: from data at rest to data in use and data in motion.

[More information](#)

[Supported platforms & requirements](#)

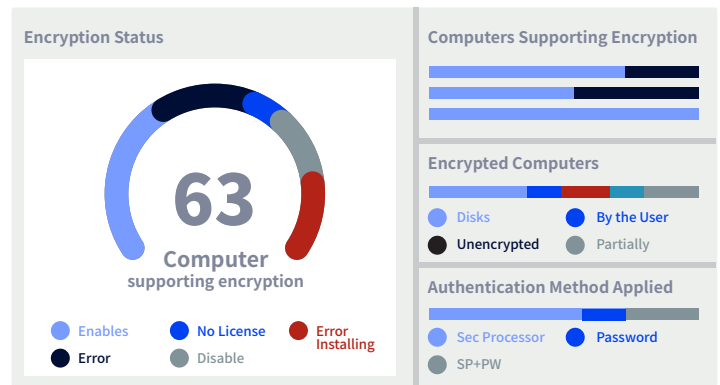

**Panda Data Control is available in the following countries: Spain, Germany, UK, Sweden, France, Italy, Portugal, Holland, Finland, Denmark, Switzerland, Norway, Austria, Belgium, Hungary and Ireland.*

Panda Full Encryption

Panda Full Encryption is an additional module for Panda Security's endpoint protection and advanced adaptive security solutions, designed to centrally manage full disk encryption and provide the following features: Full drive encryption and decryption, centralized management and recovery of encryption keys, lists and reports and centralized policy application.

[Supported platforms & requirements](#)

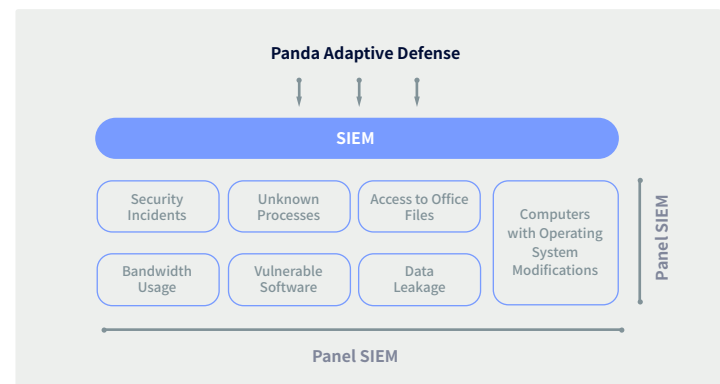

SIEM Feeder

SIEM Feeder. Panda Adaptive Defense and Panda Adaptive Defense 360 seamlessly integrate events gathered from protected endpoints with existing corporate SIEM solutions without additional deployments on user devices. Monitored events are sent securely using the LEEF/CEF formats compatible with most SIEM systems on the market either directly or indirectly via plugins.

WatchGuard distribution. Purchase and set up requires assistance from WatchGuard staff.

DNSWatchGO

DNSWatchGO is a Cloud-based service that provides domain-level protection, content filtering, and integrated security awareness training to keep your users safe when they travel outside of your secure network perimeter. When critical alerts are seen, WatchGuard's team of security experts performs a tailored analysis of the potential threat, following up with an easy-to-understand accounting that includes detailed insights about the potential infection. When a user clicks a malicious link, DNSWatchGO automatically redirects them to a safe page and offers resources that reinforce security education.
