

TERAMIND

Insider threat management, data loss prevention and incident forensics powered by behavior analytics and endpoint telemetry

About

Since 2014, over 10,000 organizations have trusted Teramind to provide insider threat management, data loss prevention, and in-depth incident forensics tools through behavioral user data. By harnessing behavior analytics, our award-winning platform has helped enterprises in finance, retail, manufacturing, energy, technology, healthcare, and government protect their businesses and safeguard their sensitive data against threat.

What We Offer

Insider Threat Prevention

Counteract data misuse, malicious activity, and exfiltration attempts with automated responses that combat insider threats to data

Incident Forensics

Enhance incident forensics and investigations with comprehensive endpoint telemetry and user activity data

Privileged User Monitoring

Secure data against the malicious and accidental missteps of users that have the most access and can do the most damage

Fraud Detection

Defend company and customer data against misconduct by leveraging field-level data analytics to detect and prevent fraudulent activity

User and Entity Behavior Analytics

Keep your enterprise protected in today's complex threat landscape with user and entity behavior analytics validated by machine learning

Behavioral Data Loss Prevention

Strengthen your defensive posture by protecting sensitive data through endpoint telemetry and behavior analytics

Insider threats have risen

44%

over the past two years
