

Threat Command

| Minimize Risk From External Threats

Minimize Risk from External Threats

Security teams are inundated with endless alerts from an ever-evolving threat landscape. Unfortunately, more alerts don't guarantee better protection and it's often difficult for many security teams to extract relevant information and value without a huge investment in staffing and time.

Threat Command takes the complexity out of threat intelligence and delivers instant value without the heavy lift of traditional threat intelligence solutions by continuously discovering the critical threats targeting your business, and mapping that intelligence to your unique digital assets and vulnerabilities. You'll benefit from tailored, relevant threat intelligence that minimizes exposure to your brand, while significantly reducing the workload on your security teams.

Value to Your Organization

Gain 360° External Threat Protection: Simplify your entire threat lifecycle - from detection to investigation and remediation, with the broadest coverage in the industry from external threats across the clear, deep, and dark web.

- Receive actionable alerts categorized by severity, type (i.e., phishing, brand security, data leakage), and source (i.e., hacking forms, social media, black markets).
- Implement alert automation rules based on your specific criteria to precisely customize and fine-tune alert management.

Accelerate Response: Maximize return on investment from your existing security devices with our broad ecosystem of SIEM, SOAR, XDR, VM, endpoint, firewall, and network technology partners and integrations.

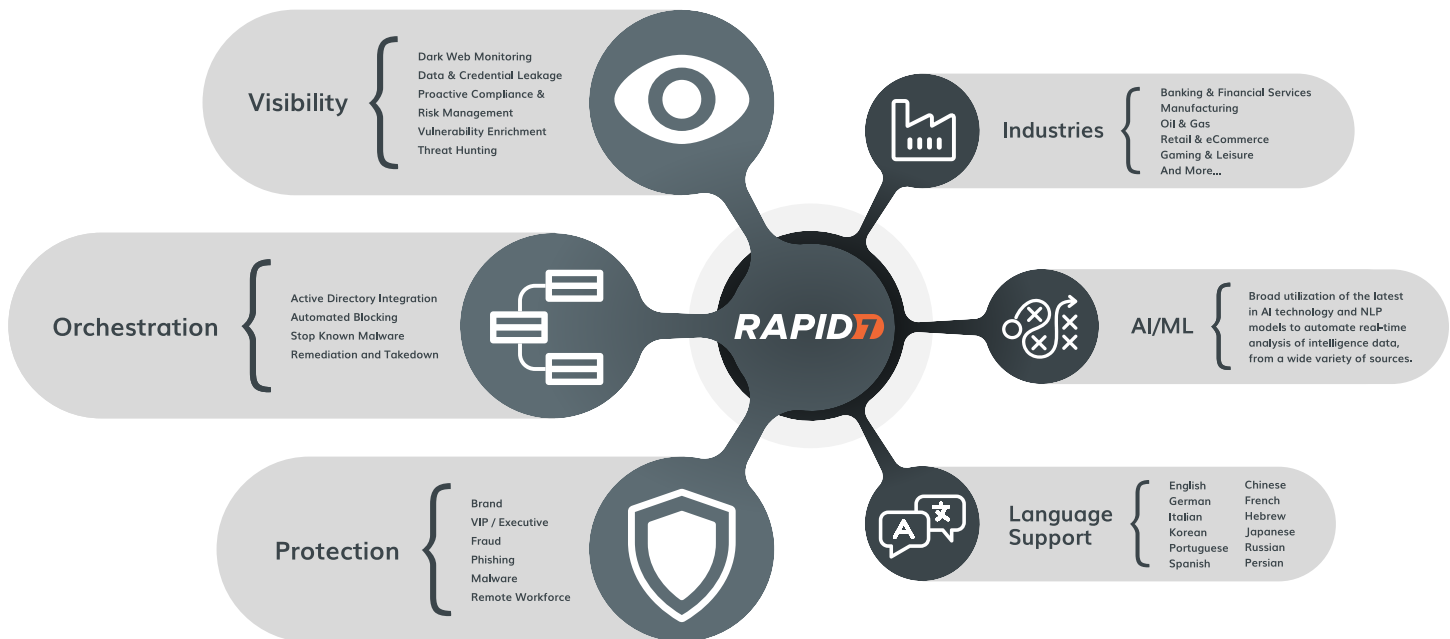

- Instantly route suspicious domains to blocklists. Set up automated threat blocking workflows including our Active Directory password reset to reduce risk exposure.
- Leverage our expert analysts, available 24x7x365 -- and our tools, such as Threat Command Extend™, to shorten investigation time, accelerate alert triage, and speed up incident response.

Save Time and Resources: Utilize our in-house, single-click remediation offering for instant proactive response to threats.

- Count on industry-leading average success rates of over 85 percent in less than 24 hours of takedown, reducing the amount of time your brand is exposed.
- Coordinate cross-functional response and automate takedowns with our simple one-click remediation feature.

Simplify Workflows: Easily manage users across multiple teams with a centralized cloud-native platform offering accelerated onboarding, and an intuitive dashboard that displays highly contextualized alerts with a low signal-to-noise ratio and minimal effort.

- Our interactive dashboard makes it easy to turn intelligence into action, streamline security operations, and reduce risk.
- Take advantage of unlimited user seats and multi-tenancy capabilities for large organizations and MSSPs.
