Online and Offline Multi-Factor Authentication

Push-Based Authentication

Secure authentication with one-touch approval. You see who's trying to authenticate, and where, and can block unauthorized access to your resources.

QR Code-Based Authentication

Use your camera to read a unique, encrypted QR code with a challenge that can only be read with the app. The response is typed in, to finalize the authentication.

Time-Based One-Time Password (OTP)

Retrieve your dynamic, time-based, one-time password as displayed, and enter it during login.

User-Friendly Mobile App

- Available as a mobile app – nothing extra to carry
- Supports multiple tokens
- Supports multiple authentication methods
- Personalize with pictures and names
- Apply PIN and biometric protection
- Designed for both iOS and Android
- Free to download

WatchGuard Cloud – Sync to LDAP or AD and Allocate Tokens Automatically

The screenshot shows the WatchGuard Cloud Admin interface. The top navigation bar includes 'Dashboard', 'Monitor', 'Configure', and 'Administration'. The left sidebar has a red 'AuthPoint' header and a list of navigation items: Summary, Management, Resources, Groups, Users (highlighted), External Identities, Gateway, Hardware Tokens, General, Downloads, and Settings. The main content area shows a table of users with the following columns: USER NAME, NAME, EMAIL, GROUP, and TOKEN. A search bar and a '+ Add User' button are located at the top right of the table area.
